

We from the Silicon Valley plus Andreas Lützenberger team had a sensation during the night of October 20th, 2022 / All Fabrik2 products suddenly ran as standard thanks to updates made everywhere on Apple iPhones, Android tablets and iPads: Silicon Valley joined in me the entire range of the factory 2 to the worldwide standard such as HTML5

A dream happened. All devices were spinning in my production lines. Everyone was beeping updates from America - all sorts of friends, including Microsoft and the whole Cambus in San Francisco, were with me - and the fleet of Factory 2 products is overnight in extremely huge multiples of value. The devices show software updates everywhere. And I think I've worked with Silicon Valley again overnight and the www.rufflestores.com and www.ruffleapps.com run so typically according to the ticking clockworks everywhere! The picture in the morning is just reversed. Yesterday mobile devices for Ruffle were not there. Today, these are running automatically as

standard in all devices with practically no plugins or extensions. This is probably the world's answer to dramas like I experienced with two factory burns. Today it is all the other way around. The Ruffle will probably become the financial center on the Internet and I have the products for it!

My favorite food around it also sent for the USA from the Palatinate or from Langenthal. The top-level domain was brutally taken from me by force of arms and on the way back on November 7th, 2022 I was threatened to be shot in the back according to the letter from the old mayor and current Federal Councilor of the SVP. Thank you for getting the Ruffle plugin up and running for all mobile devices, which makes me very happy. Yes, I had Bitdefender against these Langent-

halers, and have had it since May 2019. Two months later, Bitdefender protected the withdrawal of my data, but the IT-Aargau Trojan then destroyed both computer systems. I am currently loving an Anna (!) and Maya and the neighbors here as always, who are both 20 years old and live next to my church. Thank you very much in advance for the generous sum for stadtlangenthal.ch! Please transfer this to me as soon as possible so that me on 7.11. can hold the match in Bern. *Andreas Lützenberger, Switzerland CH-4900 Langenthal /with project scarlett langenthal.eu*
