October-Marketing in October 2022

The measuring device in the middle of the two production lines (of three in total) shows 686 PPM. There's a lot of October marketing going on

Nothing great happened this weekend? Nothing really, I reply. Or does it?! It's the federal level at the very top that deals with these websites here. There are two worldwide factory websites 1 and 2. Factory 2 for two months now. Bitz-like an echo went around the world, since English-language shops have also emerged with corresponding English-language Rufflestore.com products that can be used worldwide. No one in the world can follow here, not even a university from any country. GitHub or others who know that they have promoted me so far worldwide are specified. They certainly know!

The town clerk service of the city administration was also standing in the middle with a revolver, wanted to shoot everything down with a revolver, then on September 10th, 2022 came the mean letter from the "city revolver from the local Langenthal" - his apprentice would be willing to pay CHF 1000 in damages. However, higher bodies than the cantonal ones have long been involved. This goes too far in October marketing, which, by the way, we are professionally standing with both factories on the Internet in world shops that are always connected, where the whole world can go shopping for a few weeks.

It should continue to be as it had to be. In four flu days I reported the political knockout to the doctor, two hours later that I had survived Omicron and the scanner program created in four fever days as a salvation for the entire

professional world (within my graphics branch) was fully functional and flawless just when the Omicron was defeated asked.

Link to App-Wende worldwide: click here

<https://www.a4web.de/1832/Preprocessor-Uhrwerk-1-10-6-21.php>

there on this link under CAL tool it can be seen that from app no. 25 quick times to App_Nr. 100 continues with the globally sought-after Ruffle Content Management System by Scannerprogramm by Omikron by Andreas Lützenberger Made in Switzerland

Daniel Steiner revolvers I and II against my clockwork manufacturing factories 1 and 2 locally by a town clerk from Langenthal are only local and cannot have been overlooked cantonally through Dunantstrasse 6 as of this weekend by the federal judge's office: this is forbidden!

The photo above shows many years of the required purchase of www.langenthal.eu for currently CHF 75,000! From past cooperation between our company and around 6 local authorities, this domain is the largest top-level

purchase result (freelance work for many years at this top-level, from Rapperswil to Zurich and Basel, top-level workers who have been freed for years on behalf of the city).

Revolvers are of no use here, not even a legal play off by the town clerk on September 10, 2022. Federal judges are now judging it this weekend. That's the great thing, about which I report again, as I have for years, every weekend.

The former world boxing champion also announces victory in Ukraine.

We are European administrators of products used around the world and do not need local authorities who have never earned anything from exports, but have only deducted taxpayers' money from the other export companies here in Langenthal.
